Hyderabad, India

Passionate Front End Web Developer with 4+ years of experience in building and maintaining highly responsive user interface components. I like to craft solid and scalable frontend products with great user experience.

Technical Skills

Highly Skilled

ReactJS, JavaScript, Redux, HTML5, CSS3, Sass

Skillful

Typescript, Bootstrap, Python, Docker

Work Experience:

KROLL (Formerly Duff & Phelps)

Software Engineer II (*Dec 2020 – Till Date*)

Audited Financial Statements Extraction/ General Table Extraction Project

An application which helps to review PDF files & extracting the finance details to excel files. We generate the Output sheet by identifying the fund type and filling the sheet based on appropriate fields. Sheets that need to be filled are tables extracted from the pdf and their corresponding fund types.

- ✓ Worked closely on building the JSON structure.
- ✓ Implemented react pdf viewer and explored its functionalities. Enabled features like highlighting a value in the pdf on click of that value in the table.
- ✓ Worked on displaying pdf in split screen as well as in a new tab according to user preference.
- ✓ Co-ordinating with junior dev member, assigning tasks and helping them to resolve issues.

RegAxis

RegAxis Application provides service for its clients who are utilizing the services for Compliance Consulting. The project provides the Compliance Consultants and Compliance Managers to assist their clients to avail different features like Onboarding, Compliance Calender, Event Driven Checklists, Compliance Training etc. It is done as part of modernizations of products where consultants used to work with Excel and desktop applications. They are migrated to digital products with latest technologies like React and dot net core.

- ✓ Worked closely in an agile environment with my team.
- ✓ Actively participated in all the sprint grooming and planning sessions and picked up tasks that interested and challenged me.
- ✓ Implemented using React, Redux, antd for common UI components.
- ✓ Translated UX wireframes from figma to UI

- ✓ Actively took part in demonstrating the application in Sprint Reviews.

Auth0

Auth0 is a flexible solution to add authentication and authorization services to other applications. Cost, time, and risk that come with building own solution to authenticate and authorize users can be avoided.

- ✓ Worked closely on how to enable, disable authentication to various applications.
- ✓ Customize the authentication settings according to user requirement
- ✓ Created a standard login page for the whole organizations applications and allowed few customizations according to the user.
- ✓ Fetched user's data through the token and activating the authorization based on user's info.

Virtusa

Engineer (May 2018 – Till Date)

MetLife is among the largest global providers of insurance, annuities, and employee benefit programs, with 90 million customers in over 60 countries.

Remix framework and React JS library was used to create components and design the web pages. I have also used HTML, CSS to style the web pages.

- **MetLife – R8 Provider Portal**

An application on top of Micro services connected to Mongo DB. We need to on board Voluntary benefits products in Global Sales and Service platform from MET online.

- **MetLife – Gulf & DTC Mobile App**

An application where we need to on board user details and the type of insurance details in GSSP platform from MET online. It is Dubai based project done using media queries as it includes mobile Application also.

- **MetLife – Servicing Patterns**

A composer and a customer application has been built wherein customer application displays fields based on composer configurations. The servicing patterns is an application where we on board products in GSSP platform from MET online.
